		<b>Vet Exam:</b>	OK for surgery

**TEST RESULTS**

CBC Panel Lytes results attached	HW Test: Pos Neg	Fecal Direct: Neg Positive: _____
Skin Scraping: Demodex Scabies Negative		Fecal Flotation: Neg Hooks Rounds Coccidia Whips
( Ear Swab Oil: Neg Mites ) ( Ear Cytology: Neg Yeast Bacteria )		Tapes Other: _____

**DESCRIPTION**

**Asilomar Status (Shelter Animals):** healthy treatable-rehabilitable treatable-manageable unhealthy-untreatable unclassified n/a

**Breeds:** Breed 1 \_\_\_\_\_ Breed 2 \_\_\_\_\_

**Color:** Color 1 \_\_\_\_\_ Color 2 \_\_\_\_\_ Color 3 \_\_\_\_\_

**Patterns:** ( agouti badger bellyblaze bicolor brindle chestblaze clockface harlequin mask merle R-mitten L-mitten sable saddle salt-pepper R-sock L-sock solid spotted tick tricolor tuxedo )

**Bite Status:** has not bitten has bitten unknown

**Health Status:** Healthy Minor Issues Moderate Issues Severe Issues

**Normal Coat:** ( short medium long ) ( smooth curly wiry ) ( feathered thick thin corded hairless clipped )

**Ears:** ( cropped notched R L tipped R L scarred R L missing R L ) ( erect semi-erect folded droopy long curled )

**Eye Color:** \_\_\_\_\_

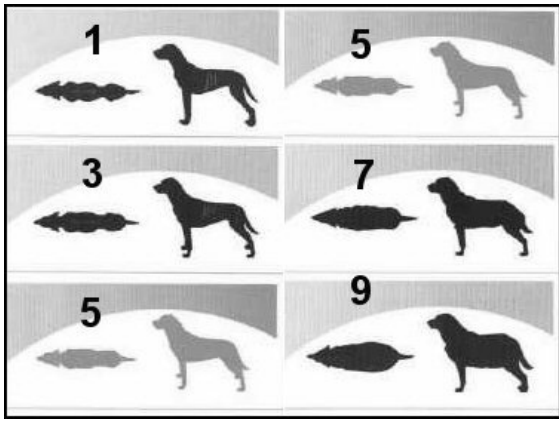

**Tail:** none docked short docked medium bobbed long corkscrew kinked long curled

**Collar:** color \_\_\_\_\_ ( cloth nylon plastic leather metal pinch metal choke chain )

**Distinguishing Marks:** \_\_\_\_\_ **Belongings:** \_\_\_\_\_

**EXAMINATION In Computer**

<b>Check for ID</b>	Tattoo: _____	Microchip Scan: none Number _____	Same as in record Date: _____
<b>Temperature</b>	_____ °F	_____ °F	<i>normal – 100-102°F, flag &gt;103°F</i>
<b>Heart Rate</b>	beats per minute muffled		Normals: puppy 80-220; toy dog 80-180; medium-large dog 70-160; giant dog 60-140
<b>Respiratory Rate</b>	breaths per minute panting trembling		<i>normal &lt;40 per minute if not panting</i>
<b>Weight</b>	Pounds		<b>Flag BCS &lt;3 or &gt;7</b>
<b>Body Condition Score</b>	1 2 3 4 5 6 7 8 9		<b>1 – emaciated</b> – ribs, spine, pelvis and bony prominences evident from a distance, no fat, loss of muscle.

- 2- very thin** - ribs, spine, pelvis easily visible, no palpable fat, minor loss of muscle mass.
- 3 – thin** – ribs easily palpated and sometimes visible, spine visible, no fat over the ribs, pelvis becoming prominent, obvious waist and abdominal tuck
- 4 – underweight** – ribs easily palpated with minimal fat covering, waist visible from above, evident abdominal tuck.
- 5 – ideal** – ribs palpable but not seen, waist seen from above, abdominal tuck seen from the side
- 6 – overweight** – ribs palpable through excess fat covering, waist not prominent from above, abdominal tuck seen from the side
- 7 – heavy** – ribs difficult to palpate, fat deposits at lumbar and base of tail, waist absent or barely visible, abdominal tuck may be absent
- 8 – obese** – ribs palpable only with very firm pressure, heavy fat deposits at lumbar and base of tail, no waist or abdominal tuck, may be pot bellied
- 9 – grossly obese** – large fat deposits over back neck and limbs, no waist or abdominal tuck, pot bellied.

<b>Age Estimate</b>	Juvenile: _____ weeks months	adult: young mature <b>geriatric (flag)</b>
	2-4 weeks - No teeth	4-5 months - Permanent incisors coming in, then premolars & molars
	3-4 weeks - Deciduous canines coming in	5-7 months - Permanent canines coming in, all teeth by 7 months
	4-6 weeks - Deciduous incisors & premolars coming in	1 year - Teeth white and clean
	8 weeks - All deciduous teeth are in	1-2 years - Tartar buildup and tooth wear begins
	3 1/2 - 4 months - No permanent teeth yet	Recessed gums often means geriatric
